EDUCATION

Degree/Examination	Year	Institution	CGPA/Percentage
B.Tech (CSE - AI)	2024–2028	Netaji Subhas University of Technology, Delhi	8.05
AISSE/CBSE (Class XII)	2024	Siddhartha Public School	90%
AISCE/CBSE (Class X)	2022	K.L. International School	97%

ACADEMIC PROJECTS

CORPOGN | Enterprise CSR Platform | Next.js, PostgreSQL, Antigravity AI

Top 10 Startup Team (600+ Teams), Mentored by NASSCOM Foundation | Live: corpogn.tech

- Built an enterprise CSR management platform enabling corporates and NGOs to discover, collaborate on, and track social impact projects via a shared project-matching system.
- Implemented secure multi-role access control using PostgreSQL RLS, real-time collaboration, and an immutable audit trail for compliance and transparency.
- Designed scalable multi-tenant architecture managing multiple organizations, projects, milestones, fund disbursements, and stakeholder workflows.
- Selected among Top 10 teams out of 600+ by NASSCOM Foundation; currently scaling and deploying the platform under its mentorship program.

Course Craft | Full Stack Ed-Tech Platform | Node.js, Express, MongoDB, JWT, Bcrypt, Razorpay, Cloundinary

- Engineered a secure authentication system with OTP-based email verification, bcrypt password hashing, JWT in HttpOnly cookies (24hr expiry), and role-based middleware guarding routes for Student, Instructor & Admin.
- Implemented end-to-end Razorpay payment flow — computing multi-course order totals, creating orders via SDK, verifying authenticity via HMAC SHA-256 signatures, auto-enrolling students, and dispatching HTML enrollment emails via Nodemailer.
- Architected a modular RESTful API with 5 route groups (Auth, Course, Profile, Payments, Contact) using Mongoose schemas — supporting full CRUD for Courses, Sections, Categories & Ratings, with media uploads to Cloundinary.

MediVault | AI-Powered Healthcare Analytics & Record Management | React, Node.js, MongoDB, Python, ML

- Building an AI-powered platform helping doctors analyze patient and family medical histories using ML models to identify inherited disease patterns and predict health risks.
- Implementing graph-based visualizations for disease progression tracking alongside a centralized record system for prescriptions, lab reports, allergies, and recurring conditions.
- Ensuring data security through encrypted storage, role-based access control, and optimized APIs for real-time retrieval of large-scale healthcare records.

ACADEMIC ACHIEVEMENTS AND AWARDS

- 2nd Prize – TechForChange Hackathon by NASSCOM Foundation (pitched CORPOGN).
- 600+ problems solved on LeetCode; Pupil rank on Codeforces.
- JEE Mains Rank: 7753.

EXTRA-CURRICULAR ACTIVITIES AND ACHIEVEMENTS

- 1st Place – Inter-Hostel Badminton Tournament, NSUT.
- 2nd Place – Intra-College Relay Race, NSUT.

POSITIONS OF RESPONSIBILITY

Joint Secretary – IEEE Student Branch, NSUT

Aug 2025 – Present

- Organized hackathons and technical events; conducted DSA and competitive programming sessions for the student community.

Member – D'Code Society, NSUT

2024 – Present

- Contributed to organizing Oblivion (annual Tech Week), managing event coordination and logistics end-to-end.

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript

Concepts: Data Structures & Algorithms, Machine Learning, Web Development, DBMS, Operating Systems

Tools & Platforms: Git, GitHub, React, Node.js, TensorFlow, Scikit-learn, DeepSeek, Hugging Face, HTML Canvas
